

RITIK DESWAL

Gohana, Haryana, India 131301 | [+91-893-036-6360](tel:+91-893-036-6360) | ritikdeswal3@gmail.com | linkedin.com/in/ritik-deswal-3a3423373 | github.com/RKD-Coder

Summary

Computer science student focused on software development and data science. Experienced with Python, SQL, and machine learning across 3+ core projects. Solves technical problems using clean and maintainable code. Learns new tools quickly to deliver results and support team goals.

Education

Kurukshetra University

Bachelor of Computer Applications (BCA) — Computer Science

Kurukshetra, Haryana, India

Aug 2023 – Jul 2026

- **Relevant Coursework:** Data Structures, Algorithms, Database Management, Operating Systems, Computer Networks, Software Engineering, Object-Oriented Programming, Machine Learning Basics.

Experience

UFLEX Limited

Software Development Intern (Python & Data Science)

Sector 60, Noida, Uttar Pradesh, India

Jul 2025 – Aug 2025 (2 months)

- Built a basic **eBook platform** using Django, covering 4 user flows: browsing, registration, cart, and checkout.
- Added a **secure login system** with password hashing, protecting data for 100% of user accounts.
- Designed a **database** with 3 core tables (books, users, orders) to keep data organized.
- Created 5+ **backend API endpoints** for future mobile app support.

Projects

Time-Craft — Smart Timetable Generator (In Development) | *JavaScript, HTML5, CSS3, Tailwind CSS*

2026

- Built a web tool to generate class timetables, saving hours of manual scheduling work.
- Wrote a 3-phase algorithm to prevent schedule conflicts and balance subjects.
- Added features to export timetables to PDF, Excel, and CSV formats.

Developer Portfolio — Personal Portfolio Website | *HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS*

2025

- Designed a responsive website to show 5+ projects, skills, and experience.
- Added a contact form and links to live project demos and GitHub.
- Deployed on a custom domain for a professional online presence.

RKDCoder — AI Code Editor (In Development) | *JavaScript, HTML/CSS, Gemini, Ollama*

2025–2026

- Building a browser-based code editor with a custom **agentic AI workflow**. Links Gemini, OpenRouter, and Ollama for real-time code generation.
- Building a patch system to safely apply AI code changes across files.
- Private project under active development.

Technical Skills

Languages: Python, JavaScript, HTML5, CSS3, SQL

Libraries & Tools: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, React

Databases: MySQL, MongoDB, PostgreSQL, SQLite

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Linux CLI

Agentic AI: LangChain, AI Agents, Multi-LLM Orchestration

AI Frontend: Agentic Coding, AI Integration, Prompt Engineering, Conversational UI Design

Concepts: Machine Learning, Data Cleaning, Data Visualization, Web Development, REST APIs

Achievements & Activities

- **Project Delivery:** Built and launched BookLand in 2 months, delivering 4 core features from scratch.
- **AI Integration:** Integrated 3 AI models (Gemini, OpenRouter, Ollama) into personal projects using agentic workflows.
- **Code Quality:** Focus on clear, simple codebases and apply data science techniques.
- **Continuous Learning:** Learn and apply 1-2 new tools weekly to meet project needs.
